Name	Garden bumblebee
Scientific name	<i>Bombus hortorum</i>
Habitat (what they live in)	Grassland, woodland, towns and gardens
Diet (what they eat)	Nectar and pollen
Lifespan	28 days
Length	Up to 2cm
Weight	0.04-0.32g
When to see them	March-October
Interesting fact	It is estimated that around 80% of the world's crop species are dependent on the pollination by bees to survive
Take action for wildlife	Plant wildflowers to attract bumblebees
