

SUSTAINABLE  
PALM OIL  
CHALLENGE

SHOPPING LIST

# LEARN AT CHESTER ZOO

## WE NEED YOUR HELP IN THE FIGHT AGAINST DEFORESTATION!

Palm oil is a £50 billion industry and is estimated to be found in half of packaged supermarket goods, from sweets to cleaning products and make-up to pet food. Unsustainable means of growing and processing palm oil has resulted in widespread devastation and biodiversity loss across South East Asia.

So, we've developed the **PalmOil Scan app** in collaboration with the World Association of Zoos and Aquariums (WAZA) and led by palm oil experts from Chester Zoo, Auckland Zoo in New Zealand and Cheyenne Mountain Zoo in the USA.

It aims to transform the palm oil industry by empowering shoppers to demand change from major manufacturers which are failing wildlife, and support those that are leading the way! Buying products containing sustainable palm oil can help protect wildlife and their habitats from the devastating effects of deforestation.

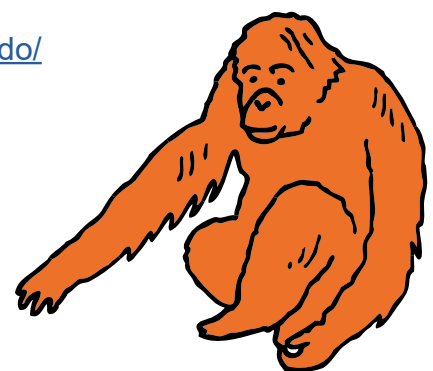

Thousands of products, including chocolates, sausage rolls and crisps have been scanned and scored, with companies worldwide ranked as excellent, good, poor or having made no commitment to sourcing palm oil sustainably.

We need YOU to use your purchasing power to help us support sustainable manufacturers! Buying only products that contain certified sustainable palm oil is an important step in helping to protect animals like orangutans and other species that share their rainforest habitat.

This **shopping list** brings together the companies who have been given an **EXCELLENT** score in the app. The list provides a list of parent companies and the brands associated with them to help children to understand which companies they can trust when it comes to Sustainable Palm Oil.

The scores are based on the companies' Annual Communications of Progress submitted to the Roundtable on Sustainable Palm Oil, and are updated every year.
