

SUSTAINABLE PALM OIL SHOPPING LIST

WE NEED YOUR HELP IN THE FIGHT AGAINST DEFORESTATION

A £50 billion industry, palm oil is found in a wide variety of supermarket goods, from sweets to cleaning products, make-up to pet food. Unsustainable methods of growing and processing palm oil have resulted in widespread devastation and biodiversity loss across South East Asia.

That's why we developed the [PalmOil Scan App](#) in collaboration with the World Association of Zoos and Aquariums (WAZA) and led by palm oil experts from Chester Zoo, Auckland Zoo in New Zealand, Cheyenne Mountain Zoo in the USA, Zoos South Australia and Mandai Wildlife Group in Singapore.

The app aims to transform the palm oil industry by empowering shoppers to demand change from major manufacturers who are failing wildlife, and support those that are leading the way! Buying products from organisations committed to sourcing sustainable palm oil can help protect wildlife and their habitats from the devastating effects of deforestation.

Thousands of products, including chocolates, sausage rolls and crisps have been scanned and scored, with companies worldwide ranked as excellent, good, fair, poor or having made no commitment to sourcing palm oil sustainably.

We need YOU to use your purchasing power to help us support sustainable manufacturers! Using the app to inform your shopping and buying products that contain certified sustainable palm oil are important steps in helping to protect animals like orangutans and the many other species that share their rainforest habitat.

This shopping list brings together a selection of companies that have been rated as EXCELLENT in the app. This list of parent companies and the brands associated with them will help people to understand which companies they can trust when it comes to Sustainable Palm Oil.

The scores are based on the companies' Annual Communications of Progress submitted to the Roundtable on Sustainable Palm Oil and other publicly available information and are updated every year.
